

PHARMNET

OUTCOMES FORMULARY -- 2009

This listing identifies in alphabetic order many commonly prescribed drugs. It may not include all drugs covered by your prescription drug benefit. It may also list drugs covered by some plans, but not others (for example- Viagra or oral contraceptives). For benefit coverage or restrictions please check your benefit plan document(s).

It is recommended that you have this list of medications available when you are with your physician, and a prescription drug is going to be part of the treatment for a clinical condition. It's important to remember that you and your physician will make the final choice for the most appropriate medication for your care.

For members enrolled in a three-tier pharmacy benefit plan the copay for a prescription drug can be summarized as follows:

Tier 1 Copayment:

Most generic drugs and a select number of brand drugs will have the lowest copayment.

Tier 2 Copayment:

"Preferred Brand" drugs and selected high cost generic drugs will have a Tier 2 copayment.

Tier 3 Copayment:

Brand name drugs that do NOT appear on this list will likely have a Tier 3 or highest drug copayment.

Important Note: If you request a BRAND name drug that has a generic alternative -- you will pay the highest copayment tier permitted by plan policy.
